### **DETAILED ACTION**

On May 7, 2007, an Office Action was sent to the Applicant rejecting claims 1-12.

On August 7, 2007, the Applicant responded with arguments.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nikander (6,029,151) in view of Melen (5,956,391), as set forth in the previous Office Action.

#### ***Response to Arguments***

Applicant's arguments filed August 7, 2007 have been fully considered but they are not persuasive. The Applicant argues that Nikander does not relate to an interface which provides for registration of a communication terminal device for use of an Internet access network and Nikander does not disclose that a cash-free payment enables the

Art Unit: 3691

actual use of an Internet access network, thereby enabling access to the Internet. In response, Nikander discloses a monetary system for use with the Internet whereby the user connects to the Internet to transfer money to and from accounts (col.5, lines 1-20). The cash-free payment is made possible by many forms of electronic money (col.2, lines 35-45).

The Applicant argues that Melen does not teach cash-free payment for use of one of the respective Internet access networks. In response, Melen was only incorporated to teach the registration process, since in order for a user to access their account to make a transfer over the Internet, the user must log into a registered account. The Examiner used Nikander as a teaching of cash-free payment.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
